

Cogent
DataHub™

"The support provided by your company has been excellent."

Lon Keeley
Harland Simon Control
Systems Inc.

"Two things I appreciate about Skkynet are your forthrightness with issues, and your quick replies to technical questions."

Richard Hill
Siemens Milltronic

Protect Your Cogent DataHub™ Investment

The DataHub Software Subscription Plan and Maintenance Support Plan let you protect your investment with regular updates.

Keep your system secure

Securing an industrial control system is a dynamic process. Almost every month new exploits are discovered and new solutions are developed. The DataHub security model is continually tested and improved to keep pace with ever-changing security standards. Participating in the Subscription or Support Plan allows you to upgrade to the latest technology at any time.

Expand your capabilities

Development is top priority at Skkynet. Based on market indicators and direct customer input, each major new DataHub version offers new features and improvements that work seamlessly with existing functionality. On the Subscription or Support Plan you can immediately update your DataHub version to add any new features.

Get priority support

Skkynet provides rapid, expert assistance via email or shared-screen phone conversations to help troubleshoot issues and resolve complex challenges. To get your system up and running as quickly as possible, the Subscription and Support Plans give you priority access to this support.

Budget predictably

Here is a way to move unexpected upgrade expenses into a manageable operating budget, and still ensure your investment stays protected. Whether you choose the annual Subscription Plan or Maintenance Support for perpetual licenses, the fixed cost is far less than purchasing a license upgrade.

To add support to your licenses or find out about subscriptions, contact your reseller partner, or email sales@skkynet.com
